

MARKET SUPPORT

Company Credentials 2026

Know which consumers move the number.

Independent Thai market research since 1995.
Quantitative and qualitative research, nationwide fieldwork and our own discussion facility in Bangkok.

Market Support at a glance

Established	1995, Bangkok. An independent, medium-sized Thai market research company.
Membership	ESOMAR. Our practices conform to its international code and standards.
Services	Quantitative and qualitative research, desk research and workshops.
Team	30+ full-time staff: research & client service, field operations, quality control and data processing.
Field force	200–300 trained part-time interviewers nationwide, a dedicated telephone (CATI) team and a medical/healthcare field team.
Quality control	50–100% QC; at least 50% of each interviewer’s questionnaires back-checked on every project.
Facility	Own discussion room, client observation room and meeting room at Vanit Place Building 2, near MRT Phetchaburi.
Sectors	FMCG focus, plus retail, telecom, banking, insurance, hard-lines, automotive, healthcare, HORECA, agriculture and business services.

Our mission

To provide the best consumer understanding, and to use consumer insights creatively to help clients build strong brands and innovate successfully.

30	years in Thai market research
30+	full-time staff
50–100%	quality control

How we're organised

Four teams work on every project, so the people who design your study stay close to how the data is collected, checked and processed.

1

Research & client service

Led by partners and Research Directors with diverse backgrounds and expertise, working in close partnership with each client account from brief to debrief.

Partners & Research Directors

2

Field operations

An experienced fieldwork team that runs studies of any complexity nationwide, completing data collection on time without sacrificing quality.

200–300 interviewers on call, plus CATI and medical teams

3

Quality control

Our QC department checks at least 50% of each interviewer's questionnaires on every project, by telephone or in-person back-checks, or on-site witness.

50–100% QC on every project

4

Data processing

A dedicated data processing unit using specialist software to ensure accuracy, from data cleaning to tables and statistical analysis.

Cleaned data, tables and analysis

Clients

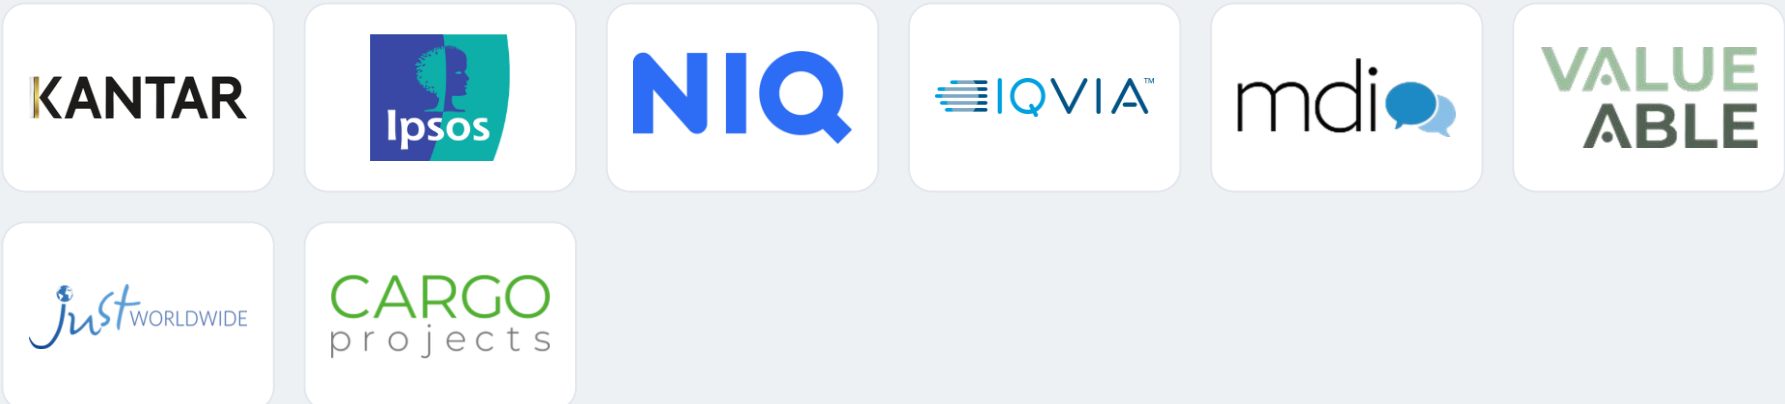

Trusted by brands and research agencies

A selection of the end clients we work with directly, and the global and regional agencies that rely on us for fieldwork in Thailand.

Brands we research for
End clients who work with us directly.

Research agencies
Agencies we support with fieldwork in Thailand.

Research for every stage of the business cycle

Every study is custom-designed. These are the research types we run most often at each stage.

01

Consumer & market knowledge

Understand what people expect, choose and use, and where growth comes from.

- Usage & attitude
- Consumer journey
- Need gaps & pain points
- Personas & consumer canvas
- Market size & landscape
- Segmentation
- Shopper insight
- Media & touchpoints

02

Ideation & screening

Explore and screen ideas against real consumer needs.

- Idea generation
- Co-creation workshops
- NPD & idea screening
- Concept testing
- Communication ideas
- Needs-to-product matching

03

Developing & prototyping

Measure acceptance and fine-tune before launch or reformulation.

- Product testing (HUT, CLT)
- Re-formulation
- Packaging & shelf tests
- Eye tracking
- Ad & storyboard tests
- Pricing
- Car clinics

04

Projecting

Estimate market potential, returns and the right target.

- Volume estimation
- Bundle testing
- Conjoint & simulation
- Go-to-market studies
- Market mapping
- Brand positioning

05

Evaluation & monitoring

Track market response and diagnose why results move.

- Brand health & funnel
- Preference drivers
- Post-launch evaluation
- Sales-drop diagnostics
- Satisfaction & NPS
- Mystery shopping

The right method for the question

An extensive range of data collection techniques, chosen for fit, quality and speed.

Quantitative

- Face-to-face interviews (random or purposive intercept)
- Central location tests (CLT)
- Home use tests (HUT)
- Exit interviews
- Telephone interviews (CATI)
- Gang surveys
- Online surveys
- Mystery shopping

Qualitative

- Focus groups
- In-depth interviews
- Pair interviews & triads
- Reconvened sessions
- Ethnography & home visits
- Accompanied shopping
- Diaries & online communities
- Ideation workshops
- Livestream interviews

Specialist set-ups

- Car clinics
- Eye tracking
- Virtual & stimulus shelf tests
- Online groups & IDIs
- Desk research
- Social listening analysis
- Co-creation workshops

Experienced in talking to everyone

Hard-to-reach audiences, recruited to industry best practice.

Kids

Tweens

Elders

Top & senior executives

Medical professionals

Business owners

Operations staff

Farmers & agriculturists

Car owners & prospects

MSP Experience

Twelve types of study we run regularly, each with real examples of outputs from past projects.

01

Consumer & market knowledge

Consumer analysis	08
Market analysis	09
Segmentation	10
Ethnography	11

02

Ideation & screening

NPD & idea screening	12
----------------------	----

03

Developing & prototyping

Product testing	13
Packaging & communication testing	14
Car clinics	15

04

Projecting

Market potential & estimation	16
-------------------------------	----

05

Evaluation & monitoring

Satisfaction studies	17
Brand studies	18
Post-launch evaluation	19

Consumer analysis

Understand what consumers expect, choose and use, then map their behaviour within the market to find what propels business opportunities.

What we uncover

Consumer insights

Consumer journey & path to purchase

Need gaps & pain points

Need states & category roles

Consumer canvas (needs-to-product matching)

Lifestyle analysis

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

01

CONSUMER SEGMENTATION

Different needs and behaviours across life stages

Explorers
Age 18–24

22%

- Trend-driven
- New flavours

Taste
Value
Brand

Achievers
Age 25–32

28%

- Health first
- Seek quality

Health
Taste

Balancers
Age 33–40

26%

- Family first
- Practical

Value
Health
Taste

Loyalists
Age 41+

24%

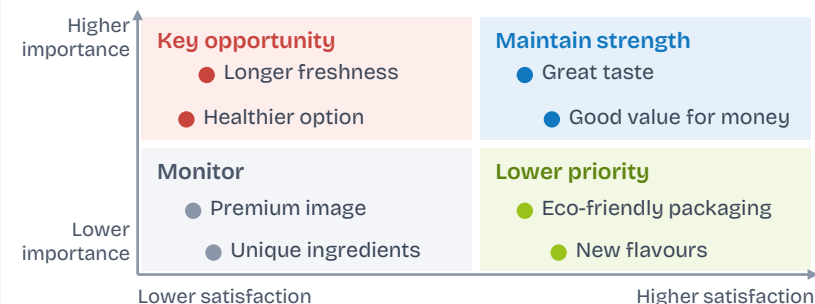

- Brand loyal
- Less trial

Brand
Value
Taste

02

NEEDS & PAIN-POINT MAPPING

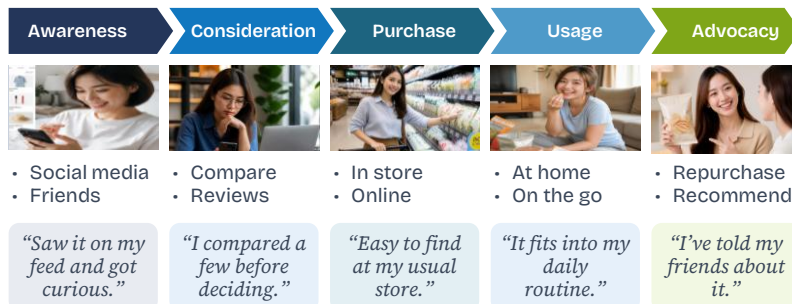

Importance vs. satisfaction, to prioritise unmet needs

03

CONSUMER JOURNEY / PATH TO PURCHASE

From first awareness to repeat purchase and advocacy

04

CONSUMER PERSONA & NEED STATES

Turning insight into a clear, actionable profile

Market analysis

A clear picture of the market, combining consumer surveys, desk research and the perspectives of key opinion leaders (KOLs).

What we deliver

Category penetration

Market size & growth

Key players & brand share

Brand perceptual mapping

Trends & market opportunity

Sources

Consumer surveys

Desk research

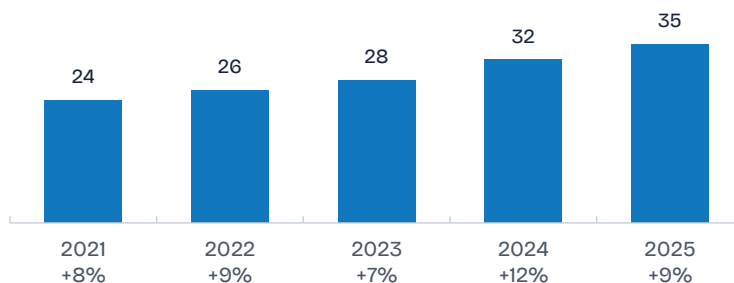

KOL interviews

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

01

MARKET SIZE & GROWTH

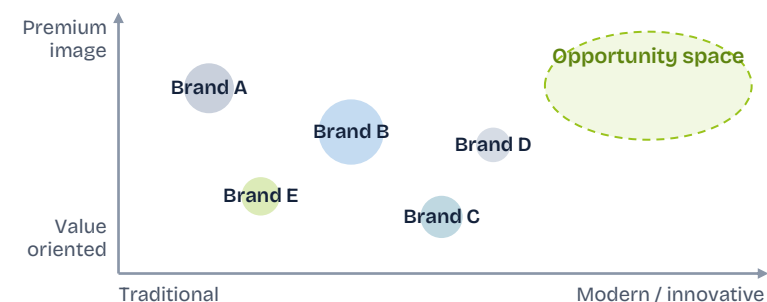

Category value (THB bn) and year-on-year growth

02

COMPETITIVE LANDSCAPE

Brand positioning and white-space opportunity

03

CHANNEL & SHOPPER INSIGHT

Where consumers buy the category, and why

Modern trade
45%

Main driver
Wide variety

Convenience store
32%

Main driver
Convenience

Traditional trade
18%

Main driver
Proximity & habit

04

GROWTH OPPORTUNITIES

Where the category can grow next

Expand in under-penetrated segments
Growing demand among younger consumers

Strengthen presence in modern trade
Highest growth and basket value

Product innovation
Healthier options and new flavours show strong potential

Segmentation

Segments that let marketers tailor products, services and communication to their target, based on psychographics as well as demographics.

Segmentations we have built

Skin care & beauty

Health-conscious consumers

Diet-conscious consumers

Farmers

Business owners

Pet owners

01

CONSUMER SEGMENTS

Distinct groups with different needs and mindsets

Health Seekers

28%

- Healthy living
- Pay for quality

Practical Families

26%

- Value-driven
- Safe & trusted

Trend Explorers

24%

- Try new things
- Social-led

Traditional Loyalists

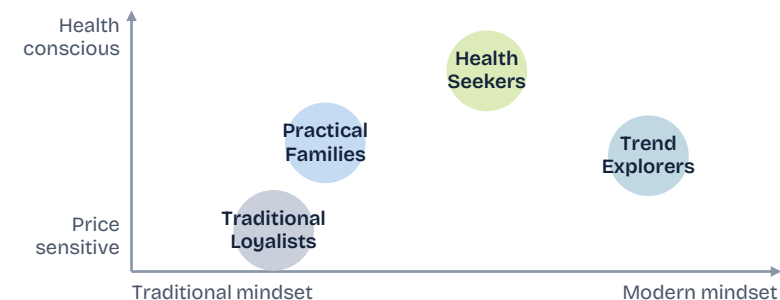

22%

- Familiar brands
- Less price-led

02

SEGMENT POSITIONING

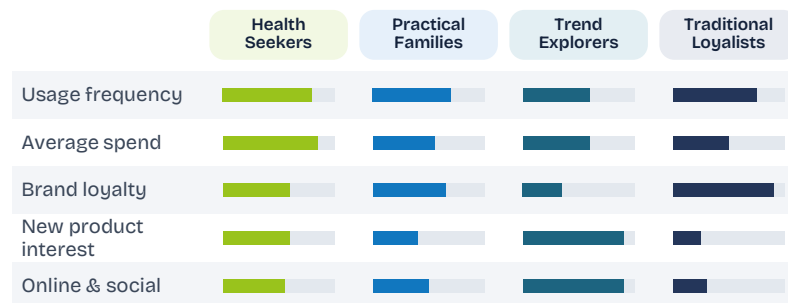

Mapping segments on key attitudes

03

KEY CHARACTERISTICS

Comparing segments across key dimensions

04

IMPLICATIONS

How each segment can be activated

Win with relevant propositions

A tailored value proposition for each segment

Tailor communication

The right message and media for each lifestyle

Prioritise growth segments

Focus investment where potential is highest

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

Ethnography

Learn consumer insights in the context of real lives, a strong starting point for new product and service ideas.

How we run it

Home visits

Accompanied shopping

Who we meet

Consumers

Small business operators

Categories

Food & beverage

Personal care

Baby care

Electrical appliances

Health products

Financial products

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

01

REAL-LIFE OBSERVATION

Understanding behaviour in its natural setting

02

KEY FINDINGS

What we learned from observing real life

Usage moments

Mostly at home, in the morning or between meals

Storage & preparation

Kept in the fridge next to everyday food and drinks

On-the-go needs

Packs need to be portable and easy to open

03

CONSUMER QUOTES

In their own words

"It's part of my morning routine before work."

Female, 28, office worker

"I like new flavours, but I need to see real benefits."

Female, 32, young mum

"I often share good finds with my friends."

Male, 26, professional

04

OPPORTUNITIES

Ideas and implications for the brand

Fit into daily routines

Convenient packs and clear usage occasions

Communicate real benefits

Focus on both functional and emotional value

Explore new occasions

Work, travel and social moments

NPD & idea screening

Delve into consumer insights to generate product ideas that stand out in a competitive, fragmented market, then screen the strongest.

Our approach

Needs-to-product matching

Projective techniques

Co-creation workshops

Qualitative idea sessions

Concept screening

Screening against

Consumer insights

Reasons to believe

Triggering points

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

01

IDEA SCREENING

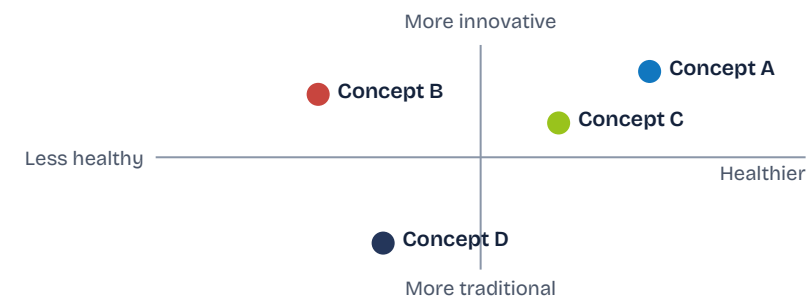

Comparing concepts on key evaluation criteria (mean, 5-pt)

	Concept A	Concept B	Concept C	Concept D
Overall appeal	4.2	3.5	3.8	2.9
Different from others	4.0	3.0	3.6	2.7
Relevant to my needs	4.1	3.3	3.5	2.8
Likely to buy	3.9	3.1	3.4	2.5
Good value	3.8	3.4	3.2	2.6

02

CONCEPT POSITIONING

Mapping concepts on key perception dimensions

**03**

CONCEPT FIT BY TARGET SEGMENT

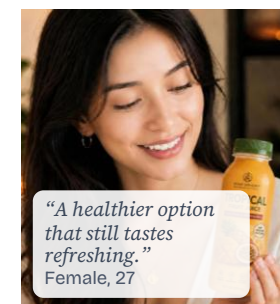

Finding the strongest concept for each segment

	Health Seekers	Busy Families	Young Explorers	Value Shoppers
Concept A	4.3	3.8	4.1	3.2
Concept B	3.6	3.9	3.4	3.1
Concept C	3.8	3.5	3.9	3.0
Concept D	2.9	2.8	3.1	3.6

04

CONSUMER FEEDBACK

What consumers like and what to improve

+ LIKES

- Fresh, tasty flavour
- Feels healthier
- Convenient on the go

- IMPROVEMENT

- A more distinctive flavour
- Clearer benefit on pack
- More natural ingredients

Packaging & communication testing

Check that packs and communication are noticed, understood and persuasive before they reach the market.

Communication

Ad & storyboard tests

Communication idea tests

In-store communication tests

Packaging & shelf

Packaging tests

Shelf tests

Eye tracking

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

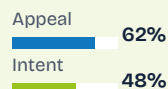

01

PACKAGING TESTING

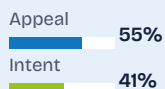

Appeal and purchase intent by pack design (top-2 box %)

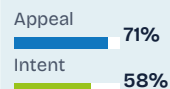

Design A

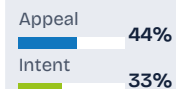

Design B

Design C

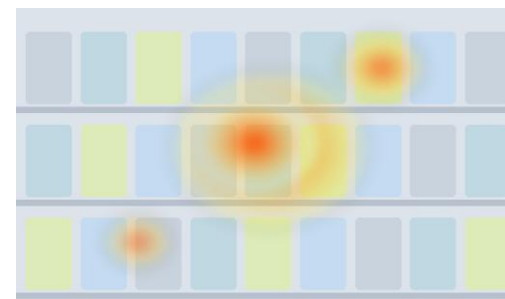

Design D

02

SHELF IMPACT (EYE TRACKING)

Heat map of visual attention at shelf

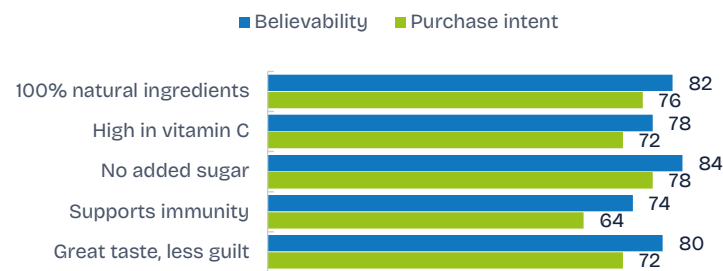

Design C

draws the most visual attention on shelf, with the fastest time to first fixation.

03

CLAIM TESTING

Believability and purchase intent by claim (%)

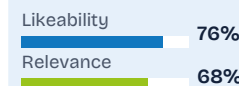

04

COMMUNICATION TESTING

Ad concept evaluation (top-2 box %)

Concept 1
Everyday moments

Concept 2
Active lifestyle

Concept 3
Family togetherness

Market potential & estimation

Estimate market potential and likely returns with consumer research, national statistics and market simulation, to inform strategic decisions.

What we use

Bundle testing (concept, product, pack & price)

Conjoint analysis

Market simulation

Financial return estimation

Data sources

Consumer research

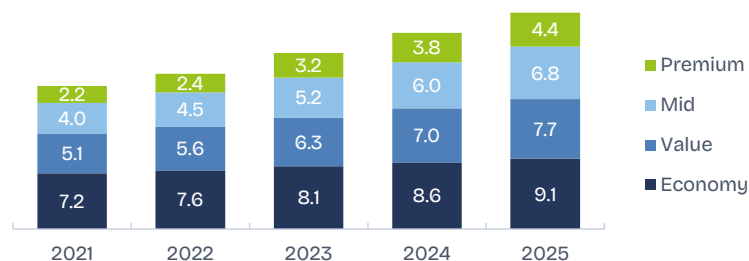

National statistics

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

01

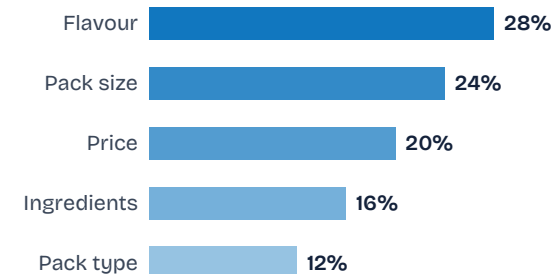

MARKET SIZE ESTIMATION

Market value by price segment (THB bn)

**02**

CONJOINT SIMULATION

Attribute importance and preferred configuration

Preferred concept
32%
simulated share vs.
18% for the current
product

03

POTENTIAL BY TARGET SEGMENT

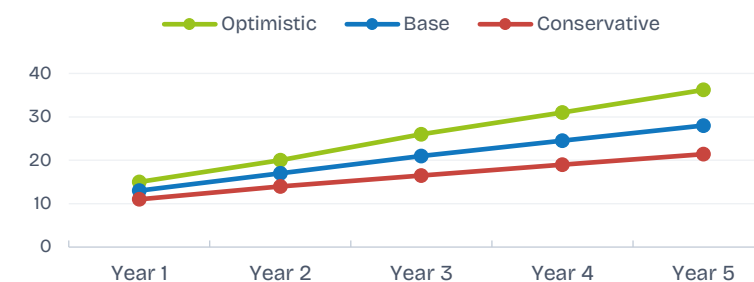

Estimated volume and value by segment

	Volume ('000 units)	Value (THB m)	Share
Young singles	1,250	625	28%
Young families	1,430	715	32%
Established families	980	490	22%
Older consumers	820	410	18%

04

SCENARIO ANALYSIS

Projected market value under three scenarios (THB bn)

Satisfaction studies

Functional and emotional satisfaction as the precursor to NPS and loyalty, with churn factors and satisfaction drivers to refine strategy.

Quantitative

Shopping malls

Convenience stores

Restaurants

Fertiliser stores

Telecom

Insurance

Education

Hospitals

Events

Automotive

Qualitative

Focus groups

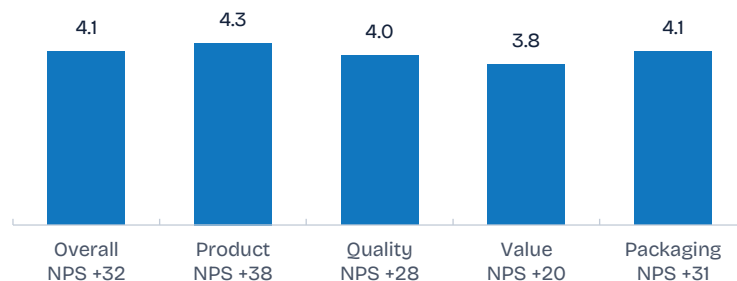

Mystery shopping

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

01

OVERALL SATISFACTION & NPS

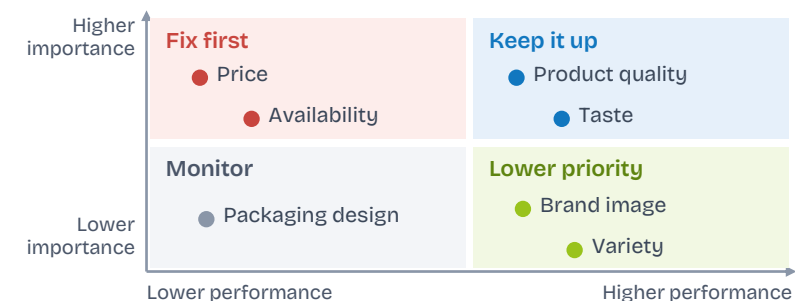

Mean satisfaction (5-pt) with NPS by touchpoint

02

IMPORTANCE-PERFORMANCE ANALYSIS

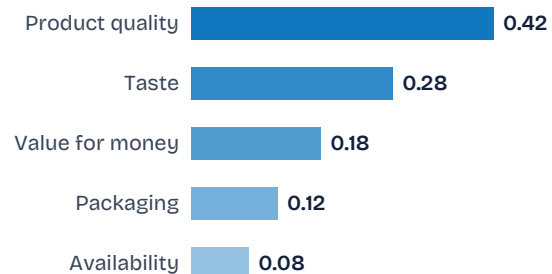

Key strengths and priorities for improvement

03

KEY DRIVERS OF SATISFACTION

Relative impact of each factor

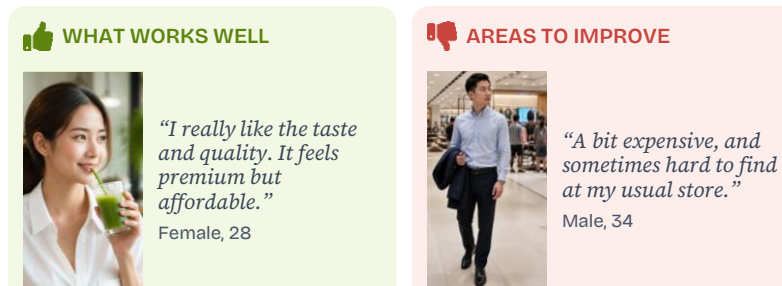

Product quality and taste are the strongest drivers of overall satisfaction.

04

CUSTOMER FEEDBACK

What works well and what could be improved

Brand studies

Understand a brand's position in the eyes of consumers and against competitors, with the approach matched to the question.

What we measure

Brand health tracking

Brand funnel

Preference drivers

Quadrant analysis

Perceptual mapping

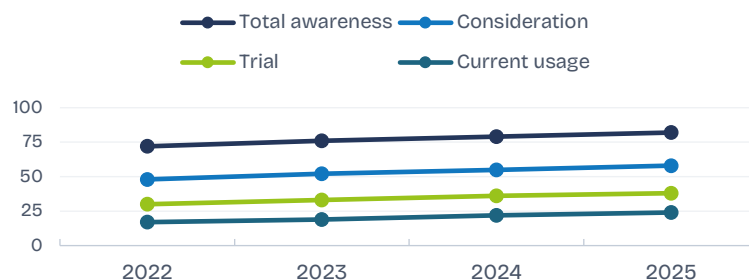

Brand imagery

Performance vs. competitors

01

BRAND HEALTH TRACKING

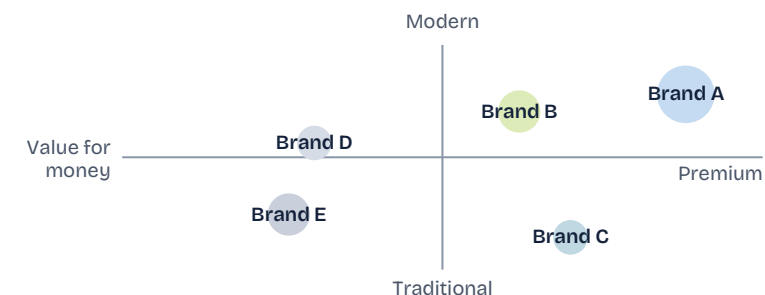

Funnel performance over time (%)

02

BRAND POSITIONING MAP

Perceptual map on key attributes

03

BRAND IMAGE & ASSOCIATIONS

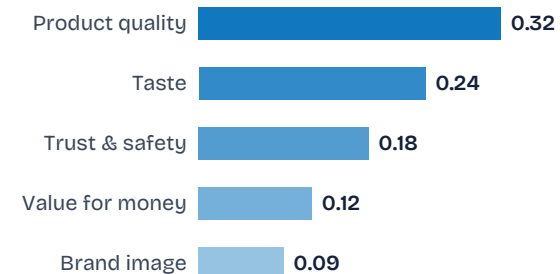

Top-of-mind associations with the brand

04

PREFERENCE DRIVERS

Which factors drive brand preference

Quality and taste are the key drivers of preference among current and potential users.

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

Post-launch evaluation

More than launch awareness: a diagnostic of what drove positive and negative outcomes, so marketing strategy can be refined.

What we evaluate

Campaign & launch awareness

Brand & message recall

Call to action

Impact on brand image

Purchase impact

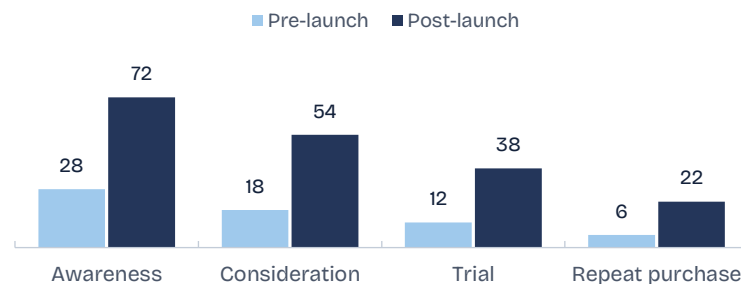

Drivers of under-performance

Illustrative outputs based on past Market Support studies. Figures and names are anonymised.

01

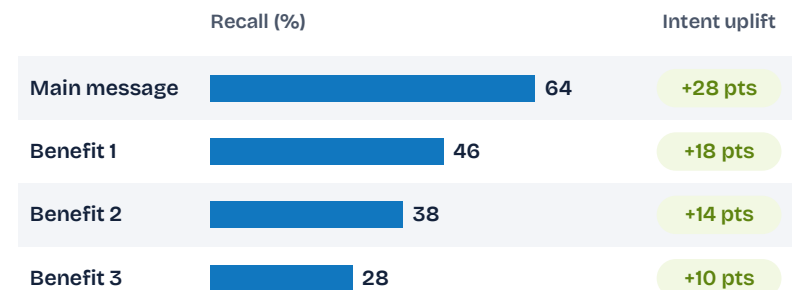

LAUNCH FUNNEL

Awareness, trial and conversion before and after launch (%)

**02**

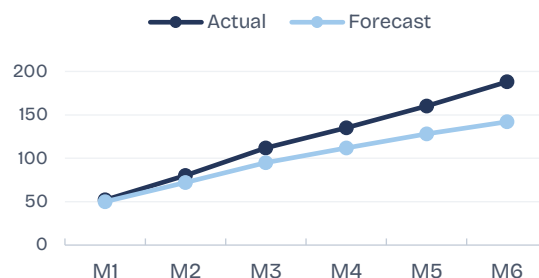

COMMUNICATION IMPACT

Message recall and uplift in purchase intent

**03**

SALES PERFORMANCE

Actual sales vs. forecast after launch (index)

+32%
above forecast by
month 6

04

CONSUMER FEEDBACK

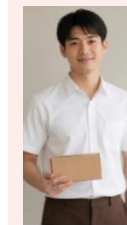

What drove trial and repeat purchase

WHAT WORKED

"The new flavour is really good and different. I'll buy it again."
Female, 26

WHAT TO IMPROVE

"Great taste, but the pack is small. A bigger size would help."
Male, 31

Car clinics

Feedback from current and potential owners on every aspect of a vehicle. We have led multiple car clinics in recent years, especially as EV technology grows.

What we manage

Venue selection & set-up

Sourcing display vehicles

Recruiting owners & prospects

Interviews & focus groups

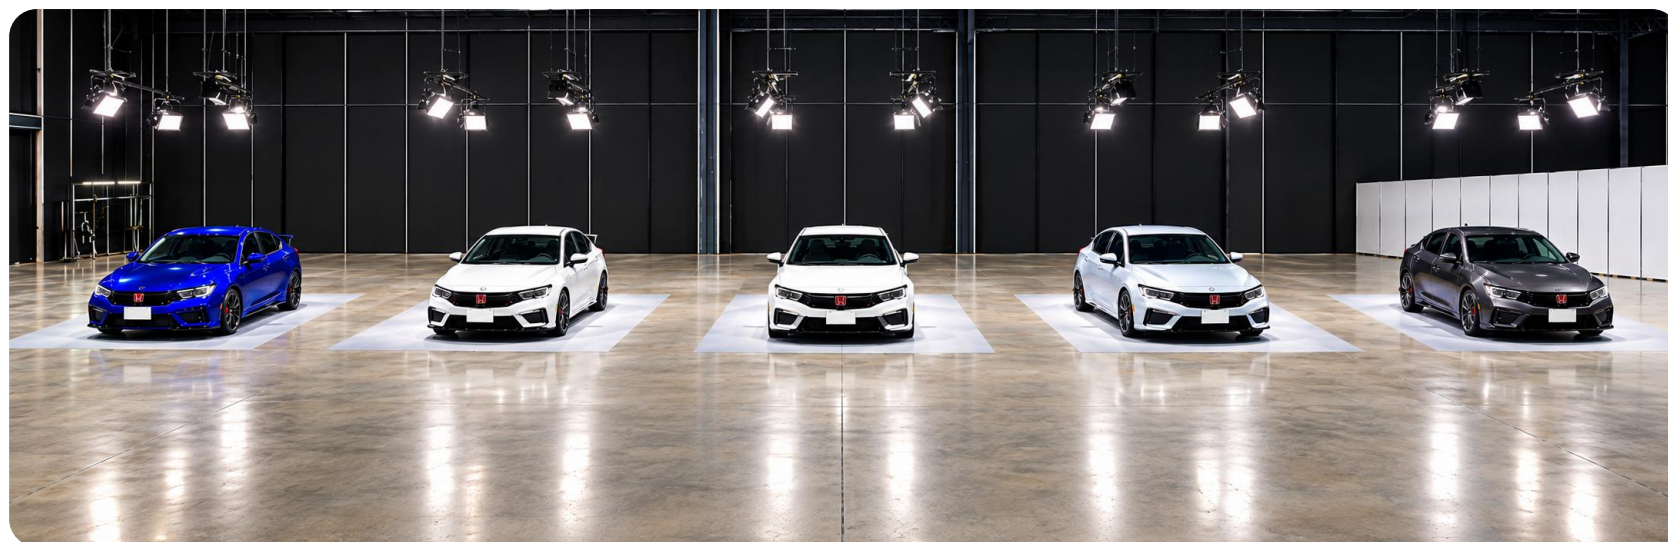

Live broadcast via Zoom

Focus areas

EV & ICE models

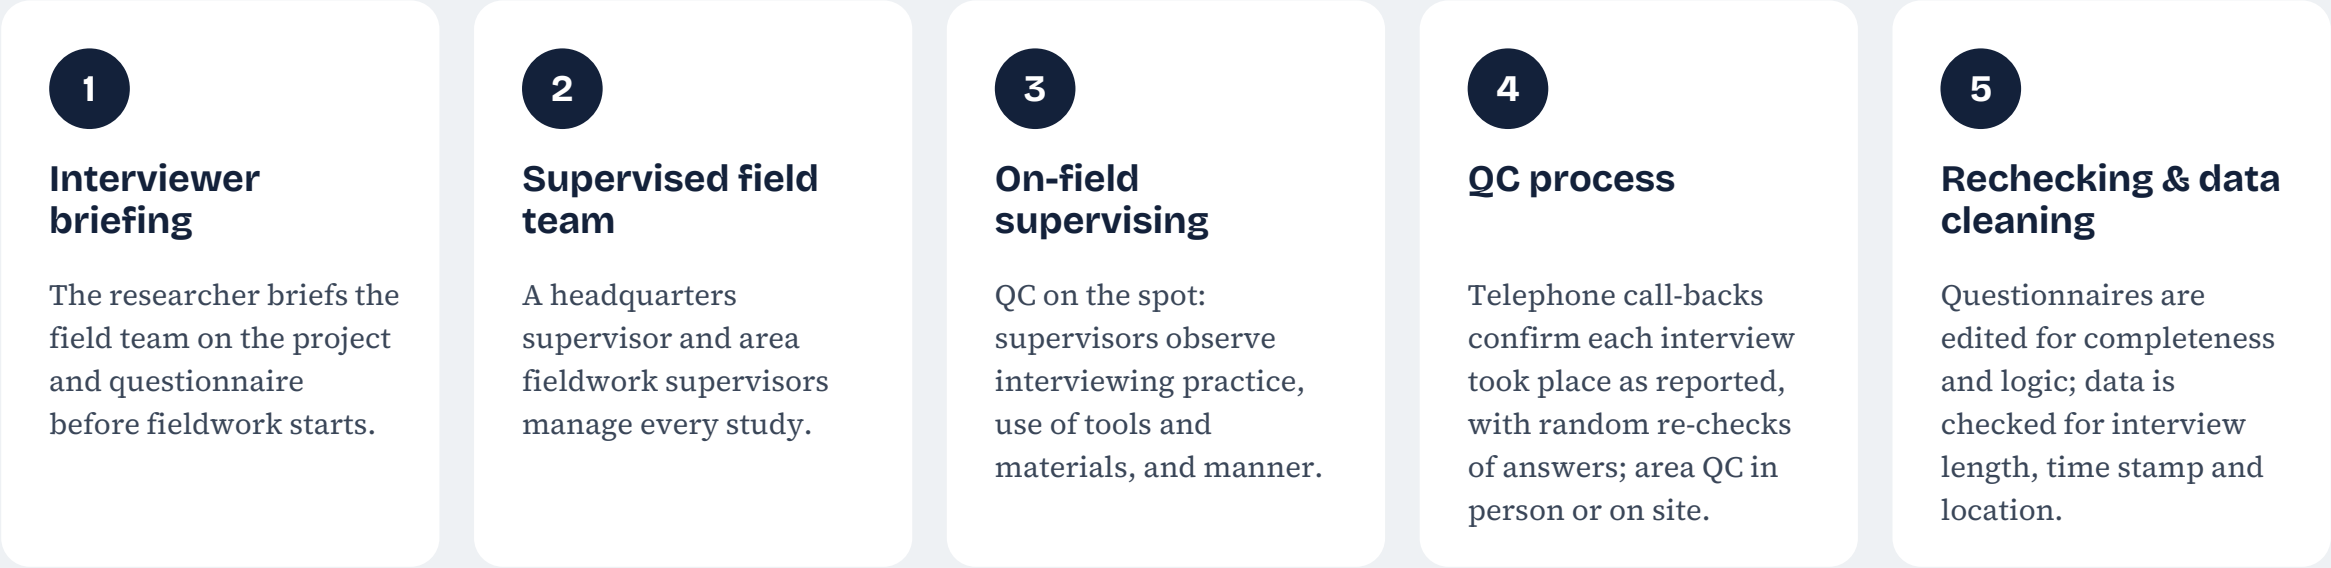

Exterior & interior

In-car technology

Rigorous fieldwork and QC protocols

Data quality is decided in the field. These steps are standard on every Market Support study.

50–100%

quality control on every project

≥ 50%

of each interviewer's questionnaires back-checked

30%

telephone call-back QC

20%

area QC, in person or on site

From data collection to decision

Scripting and data platforms that keep projects efficient, and the analysis to turn data into a recommendation.

SurveyToGo CAPI

Tablet-based face-to-face interviews by Dooblo, with GPS and time stamps on every record.

Alchemer online

Scripted online surveys, with a test link for client review before launch.

QPSMR

Data entry, CAPI and cross-tabulation: fast tables, standard banners, summary tables, filters and table-based statistics.

Statistical analysis

- Significance testing
- Preference drivers (correlation, regression)
- Perceptual mapping
- Correspondence analysis
- Penalty analysis
- Factor analysis
- Cluster analysis
- Conjoint & simulation

What you receive

- A decision-first report and presentation, in English or Thai
- Full data tables
- The cleaned dataset (SPSS or Excel)
- A debrief with your team

Who will lead your project

Every study is led by a partner or Research Director, from the brief to the final debrief.

**Chalit
Manipalviratn**
Managing Partner

In market research since 2000

Began as a research executive in 2000 and has led quantitative studies across FMCG, telecommunications, automotive and more. Known for adapting methods to each business question; a regular guest speaker on business intelligence and marketing research for TMRS and Assumption University.

**Chatinee
Trilertmala**
Managing Partner

With Market Support since 2002

Began her research career at Market Support in 2002. Works across quantitative and qualitative research, including attitude and usage studies, brand analysis and pre-launch consumer sentiment, with a strength in matching the right method to each business challenge.

**Chaporn
Manipalviratn**
Research Director

With Market Support since 2007

Joined Market Support in 2007, working on both quantitative and qualitative projects before focusing fully on qualitative research. She enjoys reading between the lines, turning the small details of what people say and do into insights that point brands in the right direction.

Research Directors

Quantitative and qualitative specialists who stay on your project from design to debrief.

**Sirin
Suchintabandit**
Research Director

Quantitative research specialist

Specialises in quantitative research across new product launches, brand health and tracking, loyalty, customer satisfaction, and post-launch and campaign effectiveness. Her industry experience spans FMCG, retail, medical, agriculture, automotive and more.

Sanida Na Ranong
Research Director

With Market Support for 16+ years

Entered marketing research during her postgraduate studies in Australia and has grown with Market Support over more than 16 years. Her expertise is quantitative research, particularly concept, product and packaging tests across many product categories.

**Wichayu
Tangajaruwattanachai**
Research Director

10+ years in qualitative research

Specialises in qualitative research, leading focus groups and in-depth interviews both online and on site, with interview set-ups tailored to each client. His areas of expertise include automotive, apps, FMCG and services.

Senior moderators

Moderators with 14 to 30 years of experience.
Simultaneous translation is available in English,
Chinese, Japanese and Korean.

Senior Moderator

"Nuch"

Kamonphat Ratana-ampai-keerati

In consumer research since 1994, with Acorn-Omnitrak, Cram Asia and Research Dynamics, where she became key moderator. With Market Support since 2005. Brings group discussions to life across food & beverage, personal care, household, financial and automotive.

Senior Moderator

"Non"

Pimachart Sreshthabutra

Started at Market Support in 1998, then led research for laundry and homecare categories at Unilever. Back since 2005, moderating groups, IDIs and creative workshops across FMCG, automotive, medical, cosmetics and skincare. Expert in projective techniques and ideation.

Moderator

"Joh"

Sutisa Sangsa-ad

Almost 20 years in marketing research, including Business Director at INTAGE (Thailand) and Research Director at Market Support. Moderates FMCG projects for major brands, with a casual, natural style that helps participants open up.

Moderator

"Net"

Arinya Tregasonnoppamas

14+ years in qualitative research, formerly Research Manager at Consumer Insight. Covers FMCG, digital platforms, retail, electronics, kitchen appliances, automotive, financial services, healthcare and government projects.

Facilities

Our own discussion facility

Vanit Place Building 2, 11th floor, New Petchburi Road, near MRT Phloen Chit. Four spaces designed around the flow of a qualitative session.

Focus group room

Discussion area

AV recording in the local language and with simultaneous translation; flat screen for TVCs and print ads; full range of workshop and ice-breaker materials.

Observation room

Client viewing area

Comfortably seats 10 observers with headsets, behind a one-way mirror.

Meeting room

Preparation & extra viewing

Respondent preparation before sessions; additional client viewing via CCTV; product preparation and sensory screening.

Lobby & entrance

Greeting & waiting

Welcome and waiting area; can also serve as a respondent preparation or sensory screening area.

Secure Wi-Fi, food and beverages provided · Starbucks, Café Amazon and a food court in the building

Partner venues and online sessions

When a study needs another part of Bangkok, or respondents who can't travel, we have it covered.

Partner studios across Bangkok	
ITF Building	Silom Road, Bangrak (between BTS Sala Daeng & Chong Nonsi)
BBD Building	Maha Phruttharam, Bang Rak
Moon Star Studio	Lat Phrao 80, Wang Thonglang
MYT Studio	Krungthep Kreetha Road, Bang Kapi
Centerpoint Studio	Lasalle Road, Bang Na

Online interviews and groups	
Set-up & broadcast	Links and invitations sent to participants in advance.
Recordings	In your preferred language, including multi-language sessions.
Interpretation	Interpreters or simultaneous translators, with webinar interpretation features.
On-screen stimulus	Testing materials displayed for assessment during sessions.
Product testing at home	Anonymised products sent ahead and unpacked live in the session.
UX & UI testing	Screen sharing and prototype links.

Working with us

Tell us the decision. We'll design the research.

1

Brief

Share your objective and timing.

2

Cost estimate

Within 24–48 hours of your brief.

3

Proposal

Detailed research design and timeline.

4

Research & debrief

Fieldwork, analysis and recommendations.
